

MADHUR GAHLOT

Computer Science & Engineering | AI/ML & Backend Developer

madhurgahlot20@gmail.com | 6397887248

GitHub: github.com/MadhurGahlot | LinkedIn: linkedin.com/in/madhur-gahlot-a9b614298

EDUCATION

B.Tech | Computer Science & Engineering
Gurukula Kangri Vishwavidyalaya, Haridwar
2023 – 2027

EXPERIENCE

C++ Programming Intern | CodSoft

- Developed multiple C++ applications as part of the programming internship.
- Built practical applications including Calculator, Number Guessing Game, To-Do List, and Tic-Tac-Toe.
- Strengthened C++ programming and problem-solving skills through hands-on implementation.

Machine Learning & AI Intern | Beeskilled

Online | July 2026 – September 2026

- Participated in a 6-week Machine Learning & AI internship program.
 - Completed structured weekly learning activities and assignments focused on Machine Learning and AI.
 - Worked through practical coursework, assessments, and internship activities.
-

PROJECTS

ReflectAI – AI-Powered Journal & Gemini Assistant

TypeScript, React, Firebase, Firestore, Gemini API, Google Cloud

- Developed a user-authenticated journaling and AI reflection workspace powered by Google Gemini.
- Implemented Google Authentication and user-isolated Firestore data access using security rules.
- Built multi-turn AI conversations for reflection, summarization, brainstorming, and action-oriented responses.

- Implemented a server-side Gemini API proxy with secure secret management to avoid exposing API keys on the client.
- Added journal auto-save, AI summaries, conversation history, search, tags, Markdown export, and profile management.
- Configured the application for deployment on Google Cloud Run.

Assignment Similarity & AI-Based Grading System

Python, FastAPI, PostgreSQL, TrOCR, Sentence Transformers

- Developed a web-based system for managing assignments and analyzing similarity between student submissions.
- Implemented JWT authentication, assignment management, submission handling, and REST APIs.
- Integrated OCR and NLP techniques for processing handwritten and typed assignments.
- Implemented semantic similarity using Sentence Transformers.
- Added automated grading functionality and interactive API documentation.

GitHub: github.com/MadhurGahlot/BCE-P663

COD Tournament Management System

Python, Flask, MySQL, HTML, CSS, JavaScript — Deployed

- Developed and deployed a web-based tournament management platform.
- Implemented modules for teams, players, fixtures, points tables, tournament updates, and player comparison.
- Added login and registration functionality.
- Deployed the application as a live web application for demonstration.

EEYE – Software-Based Air Surveillance Radar

C++, Raylib — In Progress

- Developing a software-based radar simulation for real-time air-surveillance visualization.
- Implemented radar display, grid, sweep animation, range rings, and modular C++ architecture.
- Currently expanding the radar engine with additional target visualization and real-time simulation features.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript, SQL, HTML, CSS

AI/ML: Machine Learning, NLP, Scikit-learn, Pandas, NumPy, Sentence Transformers, OCR

Backend: FastAPI, Flask, REST APIs, JWT Authentication, SQLAlchemy

Frontend: React, JavaScript, TypeScript, HTML, CSS

Databases & Cloud: PostgreSQL, MySQL, Firebase Firestore, Google Cloud

Tools: Git, GitHub, VS Code

Graphics: Raylib

Operating Systems: Windows, Linux

CERTIFICATIONS

- AI Literacy — IBM
 - Getting Started with Artificial Intelligence — IBM
 - Cloud Computing Fundamentals — IBM
 - SQL (Basic) — HackerRank
 - Python (Basic) — HackerRank
 - C++ Programming — CodSoft
 - Computer Architecture — NPTEL
 - Pandas — Kaggle
